

Use Our Equipment To Expand Your Sheet Metal Capabilities.

Dyco's Trumpf Trumatic Laser Cutter and TrumaBend Press Brake can be part of your production planning.

Now, you can utilize the most advanced laser cutting technology as well as full service metal fabrication without investing a penny.

How? A phone call to Dyco can make the latest laser cutting equipment a virtual part of your metal fabrication capabilities, along with Dyco's experienced professional staff and metal stock.

Whether you require an occasional part, or on-going assistance in design and fabrication, Dyco can be a valued asset to your business and open new profit opportunities for you.

Why Select Dyco?

For more than a quarter of a century, Dyco has designed and fabricated equipment for the most demanding industries, including dairy and pharmaceutical. Industries that expect the highest quality of manufacture combined with long life in demanding environments.

Dyco has grown to a national leader, and can share the experience of its engineering and production team to complete any level of project from single cut parts to full machine assembly, including basic machining, welding and painting.

Dyco assistance is cost-effective, and you will find the service prompt, flexible and consistent in quality.

Make Dyco Your Vendor-Partner.

Make the same choice that most leading businesses have made: utilize specialized equipment and experience of others to expand your production capabilities in an effective vendor-partner relationship.

Call us for more detailed information on all our services. We'd like to become a valued addition to your business.

Dyco INC.

Innovators in Equipment Design and Fabrication

**Dyco's Trumpf L3030
Laser Cutter**

Dyco Capabilities

Trumpf Laser Cutter

4000 Watt Resonator

5' x 10' Sheet

Cuts Aluminum up to 3/8" Thick

Cuts Stainless Steel up to 1/2" Thick

Cuts Steel up to 3/4" Thick

Cuts Round and Square Pipe from 3/4" to 16" Diameter

TrumaBend V130 Press Brake

Tonnage - 144 Tons

Bending Length - 121 Inches

Lathe

Up to 20" in Diameter

Up to 3" Diameter at any Length

Over 3" Diameter up to 4' 6" Long

Welding

Up to 3/8" Aluminum

Any Stainless Steel

Any Steel

Milling

Vertical CNC Machining Center

Bridgeport Milling Machines

Small Milling Applications

Shear

Aluminum to 3/16" up to 10' Long

Steel to 10 Ga. up to 10' Long

Stainless Steel to 12 Ga. up to 10' Long

Other

Drilling • Cutting • Painting • Assembly
